

Oxford Temp CEM Flexi-Trans

Introducing Oxford Temp CEM Flexi-Trans
Esthetic temporary luting cement

Oxford Temp CEM Flexi-Trans - Clearly superior!

Oxford Temp CEM Flexi-Trans is an esthetic, dual cure temporary cement for crowns and bridges. This multifunctional methacrylic ester formulation is provided in a translucent shade to complement the shade of your temporary restoration. Oxford Temp CEM Flexi-Trans is eugenol free so as not to interfere with subsequent bonding procedures. It is packaged in an automix syringe for void free mixing and greater convenience.
